Profile

Tech Leader with expertise in engineering, computer science, and product development. Led successful projects, from social media apps to data architectures. Seeking a role that combines technical, product development, and leadership in an innovative, collaborative environment.

Education

2023 **PhD**, *University of Bamberg*, Germany
Data Architecture / Standardization / Interoperability

2010 **MSc.**, *German University in Cairo (GUC)*, Egypt
Robotics / Agent-Based AI

2008 **BSc.**, *German University in Cairo (GUC)*, Egypt

Experience

2016 – 2020 **Research Associate**, *University of Bamberg (EU Project)*, Germany

- Led the development of a data management software suite for a computer-aided manufacturing project involving companies such as Airbus.
- Developed the overarching architecture and interfaces between components.
- Identified technical requirements for the domain.
- Supervised and guided a team in developing software components.

2014 – 2015 **Managerial Roles / Lecturer**, *University of Technology Twintech*, Yemen

- Managed the IT and Multimedia faculties, reporting to the university president.
- Taught courses: *Object Oriented Programming*, *Analysis and Design of Software*, *Human-Computer Interaction*, *Research & Development*.

2011 – 2013 **Product Owner / Team Leader / Architect**, *TayalT*, Cairo, Egypt

- Managed multiple products and led cross-functional teams, reporting to the CEO.
- Designed software architectures for software applications: social media apps and games.
- Collaborated with technical, marketing, user interface, and strategic business teams to drive the success of projects.
- Developed AI players for games, resulting in improved user ratings and app rankings.

Skills

Python, Graph Databases, UML, Prolog, git, Linux CLI

Projects

2020-2023 **The Basin Network Model** *(PhD.)*: A proposed standard for inter-organizational data cataloging and exchange. Formally, it is an *interoperability framework* for *data architectures*, with a focus on identifying, describing, and sharing data assets across technical, social, and legal environments. See *n42r.github.io/phd*

2016-2019 **SIMUTOOL KM Suite**: Data management suite involving 6 interacting software solutions for an R&D computer-aided manufacturing project involving 8 companies. *Roles*: Identify domain requirements, design the overarching architecture (incl. interfaces and data formats), supervise developers. See *github.com/simutool*

2012-2013 **Greetings Studio**: A card-making and sharing social network and app. *Roles*: Product manger, team leader, architect.

2011 **Tawla AI players**: AI players for a backgammon mobile game app. *Roles*: Researcher, product lead, supervisor.

2010 **AI Grading Tool**: Tool for testing student projects in an AI course in multiple programming languages. *Roles*: Product manager, architect, supervisor.

2010 **ArtSapiens**: Software to compete in the RoboCup 2D Soccer Simulation competition. *Roles*: Co-founder, head architect, head researcher of a team of 10.

2008-2010 **Perception for Robots**: Computational and algorithmic models for robot perception. *Roles*: Research and develop models and prototypes.

2007 **Integrating Knowledge into Machine Learning**: A solution to integrate case-based reasoning into machine learning. *Roles*: Research and develop prototypes.

2006 **Obstacle Avoidance Vehicle** *(Undergrad.)*: Obstacle avoidance, maze-navigating vehicle. *Roles*: Wrote control software using PIC programming.

2005 **Alzoa.com**: Arabic news web portal indexing 100+ news sources. *Roles*: Built many web crawlers and several software information retrieval components.

2004 **Reversi3D** *(Undergrad.)*: 3D board game of Othello. *Roles*: Developed the whole project including AI players.

Languages

English: Fluent | Arabic: Fluent | German: B1 (Telc)

Publications

Published papers in top international conferences in the topics of data architecture, the IoT, semantic data management, and artificial intelligence.
